STAR TREK CONTINUES: EP. 10 'TO BOLDLY GO' PART I

TEASER

FADE IN:

1 EXT. SPACE - USS ENTERPRISE 1

The USS Enterprise SPEEDS THROUGH SPACE at warp six.

2 INT. SPOCK'S QUARTERS - USS ENTERPRISE 2

SPOCK and MCKENNAH face each other across Spock's desk, eyes closed and fingers steepled. A Vulcan meditation lamp burns on the desktop between them.

Spock's eyes open. He lowers his hands and regards McKennah in the flickering light of the lamp. McKennah's eyes also open, and she smiles at him.

MCKENNAH

Thank you for allowing me to meditate with you.

SPOCK

This is normally done in private, counselor. But it is an honor to teach Vulcan techniques to one so willing.

MCKENNAH

These... 'sessions.' They're the only times Vulcans pay attention to their emotions?

SPOCK

We find it salutary to have an interval during which to ask ourselves the question no other Vulcan may: 'How do you feel?'

MCKENNAH

(smiles)

When this mission is over... I'm going to miss these times with you.

(CONTINUED)

SPOCK

And I with you.

(beat)

Doctor. I believe you may benefit from further training with masters on Vulcan.

MCKENNAH

(gently)

Perhaps you could as well. There's a discipline called *Dalhutnar*, isn't there? To help one accept the wisdom of vestigial emotions?

SPOCK

There is also the *Kolinahr*, to purge all remaining emotions.

(beat)

There is no chance of me undertaking the former -- nor the latter.

McKennah frowns. Unsaid: 'Why?'

SPOCK (cont'd)

I am rarely disposed to discuss matters of a personal nature...

McKennah begins to press, but Spock beats her to it.

SPOCK (cont'd)

...but our relationship is... special.

(off her smile)

I have served aboard this starship for sixteen years under two captains. I would not admit this in front of Doctor McCoy. But such a lengthy association with men and women from Earth has taught me to value my maternal birthright... in a way I never could, had I remained on Vulcan.

McKennah reaches across the desk and takes Spock's hand, squeezing it. Spock lifts an eyebrow... and then, honoring the words he just spoke, he squeezes her hand back.

Off McKennah, smiling warmly in the lamplight.

3 EXT. SPACE - USS ENTERPRISE

3

The Enterprise CRUISES along.

KIRK V.O.

Captain's log, stardate six-nine-eighty-eight point four. The Enterprise is scheduled to return to Earth shortly.

4 INT. KIRK'S QUARTERS - USS ENTERPRISE

4

A weary KIRK is seated on the edge of his bed, hunched over. He's continuing to DICTATE his log into a tricorder.

KIRK

I always intended to bring her back in one piece -- but it's a bittersweet triumph. The recent loss of our sister ships still gnaws at me. Whatever caused the Hood's crew to lose their life-support -- killing all four-hundred-thirty men and women aboard -- is...

Kirk is interrupted by a COMM WHISTLE. He gets up, TURNS ON the viewer on his desk, and swivels it to face him.

KIRK (cont'd)

(into comm)

Kirk here.

UHURA V.O.

(filtered; over comm)

Priority incoming message from the Chief of Starfleet Operations.

KIRK

(into comm)

I'll take it down here, lieutenant.

INTERCUT:

5 INT. OFFICE - STARFLEET HQ - VIEWER INSERT

5

THESP, Andorian, APPEARS on the screen. Her appearance -- blue skin, antennae -- is so arresting, we hardly notice the standard gray 'The Motion Picture' uniform. Starbase patch. Rear admiral stripes.

INTERCUT:

6 INT. KIRK'S QUARTERS - USS ENTERPRISE

6

KIRK  
(into comm)  
Admiral Thesp.

THESP  
(filtered; on screen)  
Captain. Priority One. We're  
diverting you to Aldebaran.

Kirk reacts, puzzled.

KIRK  
(into comm; reacts)  
Considering the ships we've lost in  
that system recently... are you  
certain that's a wise idea?

THESP  
(filtered; on screen)  
Wise or not... it's necessary. The  
Yorktown and Republic were severely  
damaged during their investigation  
into the Hood's loss. And shortly  
afterwards... the Federation colony  
on Aldebaran Three went completely  
silent.

KIRK  
(into comm; frowns)  
What do you mean... 'silent'?

THESP  
(filtered; on screen)  
Starfleet has a top-secret  
laboratory on that world. The  
supply vessel we sent to  
investigate -- the SS Halifax --  
never returned.

                  THESP (cont'd)  
                  (off his reaction)  
          Before we lost contact, the Halifax  
          reported significant anti-proton  
          residue on the planet's surface. I  
          think you know what that means.

PUSH IN on Kirk, reacting:

                  KIRK  
          Romulans.

Off Kirk, concerned and determined...

FADE OUT.

ACT ONE

FADE IN:

7 EXT. SPACE - USS ENTERPRISE

7

SUPER episode titles as the Enterprise maneuvers into an equatorial orbit around Aldebaran III. A prominent, fresh crater is visible.

8 INT. TRANSPORTER ROOM - USS ENTERPRISE

8

SCOTT at the console. Spock -- equipped with phaser, tricorder, communicator -- is consulting the hooded viewer.

Kirk, DICKERSON ENTER. Carrying phasers and communicators.

SPOCK

Captain. Readings indicate that the colony has been destroyed.

KIRK

(reacts)

Romulan plasma weapon?

SPOCK

(shakes head)

Judging by the damage, it appears the central reactor suffered a containment failure.

KIRK

That's unusual.

SCOTT

It's impossible! I installed the safeguards myself five years ago.

KIRK

Perhaps some kind of sabotage?

Spock simply nods.

Kirk, Spock, Dickerson take their places on the pad.

(CONTINUED)

8 CONTINUED:

8

SCOTT

At least the Pandora Science Lab's intact. But it's underground... and it generates a particle scattering field. I'll have ta put ya down outside.

KIRK

(nods confirmation)

Just get us there in one piece, Scotty.

(off his nod)

Energize.

9 EXT. ALDEBARAN III SURFACE - DAY

9

Kirk, Spock, Dickerson MATERIALIZE. It's very bright: Aldebaran, a red sun, fills much of the sky. Kirk and Dickerson shield their eyes with their hands as they look around.

Spock SCANS with his tricorder (with his inner eyelid, he has no need to shield his own eyes).

SPOCK

The disruption field is obscuring my readings. I am detecting two life forms large enough to be humanoid.

Spock gestures with his tricorder toward...

10 EXT. PANDORA LAB - ALDEBARAN III SURFACE - DAY

10

The landing party approaches a small elevator bunker.

KIRK

I don't suppose they left a spare key under a rock?

Spock works his TRICORDER.

SPOCK

I can attempt to access the lift using standard Federation prefixes.

(CONTINUED)

Suddenly, a DEFENSIVE DRONE -- a floating sphere about the size of a basketball, with phaser turrets -- rises from atop the elevator bunker and heads their way!

DICKERSON  
Automated defenses!

The drone FIRES; Spock dives out of the way.

Kirk FIRES at the drone, but the beam BOUNCES OFF!

Spock joins in FIRING.

SPOCK  
We must maintain the barrage. The drone cannot fire through its own shield.

Dickerson starts FIRING too, but the beams continue to be DEFLECTED. The men duck for cover. Amidst the turmoil:

KIRK  
Got any other ideas?

SPOCK  
It is possible the turret's antigrav beam creates a gap at the bottom of its deflector screen.

KIRK  
(reacts)  
It's possible?!

Spock raises an eyebrow.

KIRK (cont'd)  
Well... if that's all we've got...

Kirk nods and does a barrel roll, dodging Dickerson and Spock's DEFLECTED PHASER BEAMS! He brings himself directly beneath the drone. SHOOTS his phaser straight up.

The drone is VAPORIZED!

Kirk gets up and dusts himself off. Spock studies the spot where the drone was a moment ago.

SPOCK  
Fascinating.

(CONTINUED)

10 CONTINUED: (2)

10

A FEMALE VOICE:

LANA (O.S.)  
You're Vulcan?

The men whirl, phasers drawn. Standing in the now-open elevator door is LANA, human, 40s, gorgeous, in a standard Federation science colony jumpsuit. She wears wraparound sunglasses.

LANA (cont'd)  
(to Spock)  
You. You're Vulcan?

SPOCK  
Affirmative.

LANA  
(smiles)  
When a simple 'yes' would do.  
Vulcan for sure.  
(beat)  
Forgive the attack. The drone's sensors thought you were another Romulan invader. The bio-signs are almost identical.  
(to Kirk)  
You're in charge?

KIRK  
Captain James T. Kirk. Federation starship Enterprise.

LANA  
(mischievous grin)  
T for 'Tiberius.'

Kirk frowns. Unsaid: "How did you know?"

And now Lana removes her glasses. She has SILVERED EYES, like the mutants we saw in 'Where No Man Has Gone Before.'

All react with surprise.

KIRK  
Who are you? What happened here?

(CONTINUED)

LANA

You don't know?

(beat)

It was your starship that pierced the barrier around our galaxy five years ago. An energy field that 'enhances' humans with high ESP quotients. Uplifts them.

(off Kirk's silence)

Since then... certain Starfleet officials have been assembling us. Testing us. Experimenting. Twenty-five in total.

SPOCK

It would appear you have journeyed through the barrier yourself.

LANA

A trial run.

KIRK

'Trial?' For what?

LANA

The ultimate last resort.

Spock puts it together.

SPOCK

Protection... against invasion.

LANA

(nods)

In the event the Federation is ever invaded by a superior force, we were to fly through the galactic barrier...

SPOCK

...granting you superior powers. Effectively... weaponizing you.

KIRK

The Federation isn't in the business of 'weaponizing' its citizens.

(CONTINUED)

LANA

You should better familiarize yourself with the Starfleet Charter. Article Fourteen, Section Thirty-One.

(off his frown)

Captain, absolute power doesn't corrupt absolutely; it corrupts selectively. As you know from experience. Aboard your ship, one uplifted esper became a megalomaniac... while the other retained humanity.

KIRK

Which kind are you?

LANA

I follow *Sas-tar-po-harn*.

SPOCK

(off Kirk's frown)

A human spiritual movement which follows the pacifist teachings of Surak and T'Mord of Vulcan.

LANA

Psychologically unsuitable espers were excluded from this project.

KIRK

About my original question... What happened here?

Lana swallows. Closes her eyes. A painful memory.

LANA

A cloaked vessel arrived. They overwhelmed the lab. Destroyed the ship sent here to investigate.

KIRK

The Halifax.

LANA

(nods)

The Romulans vaporized our scientists. And kidnapped the espers.

(CONTINUED)

KIRK

What about you?

LANA

I used my powers to suspend my life signs.

(off Spock's frown)

I 'played dead.'

DICKERSON

What do Romulans want with a bunch of espers?

SPOCK

I believe I can surmise the answer, lieutenant.

(beat)

Despite my own advanced ESP rating, my experiences with the barrier did not 'uplift' me. I suspect Vulcan physiology renders us immune to its psionic effects. And if Vulcans cannot be 'uplifted'...

KIRK

...then neither can Romulans.

(off Lana's nod)

They want to use the kidnapped espers. To form an attack force.

LANA

But not against us, captain. Against the Romulan praetor. They oppose his termination of the Klingon alliance.

KIRK

Romulan politics aren't my concern. But getting our people back is.

(to Lana)

What's your name?

LANA

Lana.

KIRK

You'll be safe with us, Lana.

(CONTINUED)

SPOCK  
Captain, a word.

Spock draws Kirk aside.

SPOCK (cont'd)  
If you recall, it was extremely dangerous to have Mitchell aboard the Enterprise after his powers had been multiplied. If we leave Lana here, she remains as we intended him to be: isolated, where she can do no harm.

KIRK  
You heard her, Spock. She's a pacifist.  
(beat)  
If we're gonna pursue a Romulan ship full of espers -- espers who may've been turned -- I wanna have one of our own.

SPOCK  
A most logical position.

KIRK  
You sound surprised.

SPOCK  
(off Kirk's smile)  
Captain. There is the matter of the other life form I detected.

A VOICE from O.S.:

SENTEK (O.S.)  
That would be me, commander.

They whirl and see a male Romulan -- whom we will later know as SENTEK. He's wearing a full Romulan commander's uniform -- and has his disruptor drawn and aimed directly at Kirk.

Dickerson aims his phaser at the Romulan.

DICKERSON  
Drop your weapon!

(CONTINUED)

SENTEK

Are you confident you can shoot me  
before I kill your captain? Disarm  
now.

KIRK

Hold your position, lieutenant!

Dickerson is torn. Sentek does something to his disruptor,  
and a THROBBING ELECTRONIC NOISE emanates from it. Reactions  
from all!

SENTEK

Surrender is not the Romulan way.  
Fire now, and this disruptor will  
detonate.

(beat)

I have no quarrel with you. Save  
yourselves. But the mutant stays  
with me.

The electronic THROBBING is INCREASING.

SPOCK

Captain. Given that particular  
model of firearm... I believe we have  
approximately twenty-eight seconds  
until a forced-chamber overload.

KIRK

(to Sentek)

We're not abandoning a Federation  
civilian!

SENTEK

You have little choice.

Lana sweeps her hand, and her telekinetic power YANKS the  
disruptor from Sentek's grip! It lands inside the elevator  
door, still BUILDING to an overload.

Sentek turns to retrieve his disruptor -- and Kirk JUMPS him!

The Romulan is much stronger than any human, but Kirk holds  
his own until Spock SURGES IN and administers a neck pinch.  
Sentek falls to the ground.

The THROBBING from the disruptor is increasing! Now an EAR-  
PIERCING WAIL!

(CONTINUED)

10 CONTINUED: (8)

10

SPOCK  
(shouts; re: Sentek)  
Captain! We cannot leave him here  
to die.

Kirk FLIPS OPEN his communicator quickly!

KIRK  
(keys comm)  
Emergency! Five to beam up! Now,  
Enterprise!

The TRANSPORTER WHINES and the group DEMATERIALIZES -- just  
as the disruptor -- and the bunker -- EXPLODE!

FADE OUT.

ACT TWO

FADE IN:

11 EXT. SPACE - USS ENTERPRISE 11

The Enterprise at warp.

12 INT. BRIEFING ROOM - USS ENTERPRISE 12

Kirk is conferring with Admiral Thesp, VISIBLE on the tabletop tri-viewer.

KIRK  
(into comm)  
Mister Sulu has detected the  
Romulan kidnappers on long-range  
sensors. We're on an intercept  
course.

KIRK  
(into comm; serious)  
Admiral, I won't lie. They got a  
head start. A good one.  
(beat)  
They'll cross into the Neutral Zone  
long before we can catch them.

THESP V.O.  
(filtered; on screen;

Starfleet out.

Thesp FADES OUT.

Kirk takes a beat to let that sink in. Then KEYS THE COMM.

KIRK  
(into comm)  
Kirk to bridge.

SPOCK V.O.  
(filtered; over comm)  
Spock here.

KIRK  
(into comm)  
Set a course for the Romulan  
Neutral Zone. Maximum warp.

15 INT. BRIDGE - USS ENTERPRISE

15

Spock in the chair. UHURA, SULU at their stations. CHEKOV  
at science. SMITH at nav sub-systems. Relief NAVIGATOR at  
nav. PALMER at engineering.

SPOCK  
(into comm)  
Acknowledged.

He SWITCHES off the comm.

Sulu turns to Spock.

SULU  
Mister Spock?

SPOCK  
You heard the order, lieutenant.

SULU  
(swallows)  
Yes sir.

(CONTINUED)

15 CONTINUED:

15

As he WORKS the controls, Spock steps over to Uhura's station. Hands her a microtape.

SPOCK

Uhura. Transmit this encrypted message on the following subspace frequency.

He PRESSES A FEW BUTTONS on her panel.

UHURA

(frowns)

Sir? That carrier wave is only used by...

SPOCK

(interrupting)

Please proceed.

(off her nod)

Direct any responses to my quarters.

And he LEAVES.

16 EXT. SPACE - USS ENTERPRISE

16

In flight.

17 INT. SICKBAY - USS ENTERPRISE

17

Lana is sitting on an examination bed. MCCOY consults his READOUTS.

MCCOY

Four-oh. Perfect.

LANA

(smiles)

I try to take the stairs instead of levitating whenever I can. Keep in shape.

Kirk ENTERS.

LANA (cont'd)

Captain.

(CONTINUED)

KIRK

We're in hot pursuit. We'll get your friends back.

LANA

And the Romulan?

KIRK

He's in our brig.

(beat)

Lana. Why was he still there? On Aldebaran Three?

LANA

(sighs)

I think he's a praetorian spy. Must've infiltrated the dissidents. He fled into the hills after they discovered him.

(beat)

We were the only people alive at the lab for weeks. Our paths crossed... frequently.

KIRK

Do you trust him?

LANA

About as far as I can throw him.

KIRK

In your case... I'd wager that's pretty far.

(off her smile)

Why didn't you? Use your abilities to subdue him.

LANA

He has... tremendous innate powers. And as I told you, captain... I'm a strict pacifist. I do not utilize my abilities to harm others unless they pose a direct threat.

Kirk frowns, as if he doesn't quite buy that. But he moves on:

(CONTINUED)

KIRK

Bones. Speaking of 'direct threats'... we'll be engaging the Romulan ship soon. I'm hoping I won't have to call on you. But...

MCCOY

If I had a credit for every time you said that.

(beat, serious)

I've got the chem lab synthesizing hyronalin. Best thing for radiation burns.

The COMM WHISTLE sounds.

SULU V.O.

(filtered; over comm)

Bridge to captain.

Kirk ACTIVATES the wall communicator.

KIRK

(into comm)

Kirk here.

SULU V.O.

(filtered; over comm)

The marauder's about to cross into the Neutral Zone.

KIRK

(into comm)

Sound battle stations, Sulu. I'm on my way.

Kirk EXITS as the KLAXON begins to SOUND and the above-door RED-ALERT LIGHT starts FLASHING.

McCoy gives Lana a reassuring nod. Unsaid: 'Don't worry.'

Off Lana, nonetheless looking very worried indeed.

18 INT. BRIDGE - USS ENTERPRISE

18

[RED ALERT.] As before (Uhura at comm; Sulu at helm; Smith at nav sub-systems; Chekov at science; relief Navigator at nav; Palmer at engineering). Everyone's very serious.

Kirk ENTERS from the lift and stands near his seat.

KIRK  
How long to the Neutral Zone  
boundary?

SULU  
Ten seconds.

KIRK  
(to Uhura)  
Lieutenant...?

UHURA  
Our orders recorded and logged,  
sir.

SULU  
Five seconds.

KIRK  
Stay sharp, everyone.

COMPUTER VOICE (V.O.)  
Warning! Treaty violation!  
Warning! Treaty violation!

KIRK  
Uhura, mute that.

Uhura HITS a control; the computer voice STOPS.

SULU  
On course for Romulan space.

KIRK  
Keep an even hand on the tiller,  
Sulu.

CHEKOV  
Out of the frying pan, into the  
fire.

18A EXT. SPACE - USS ENTERPRISE

18A

WHOOSHES by CAMERA.

18B INT. BRIDGE - USS ENTERPRISE

18B

[RED ALERT.] Sulu peers into the helm viewer.

SULU

Scanning to one-half parsec.

(beat)

No sign of the marauder, captain.

Could be cloaked.

Smith speaks up from the nav sub-systems station:

SMITH

I've got something on the motion  
sensors.

KIRK

Can we get a phaser lock?

SMITH

No sir. But he's out there.

KIRK

See if you can boost the  
directional beam. We need surgical  
precision... Take out his engines  
without endangering the habitat  
module.

She nods.

CHEKOV

(re: science viewer)

Captain... a Romulan ship is  
decloaking off our port bow!

KIRK

Shields to maximum!

CHEKOV

T'liss-class imperial bird-of-prey.  
I have visual!

They turn to the VIEWSCREEN:

19 EXT. SPACE - IRW HAWK'S TALON - VIEWSCREEN INSERT 19

A classic Romulan bird-of-prey DECLOAKS.

20 INT. BRIDGE - USS ENTERPRISE 20

[RED ALERT.]

KIRK

The marauder?

Spock ENTERS from the lift.

SPOCK

(knowingly)

Negative. The vessel is registered  
as the IRW Hawk's Talon.

Kirk gives Spock a 'what the hell?' scowl.

UHURA

Captain. We're being hailed.

Kirk nods for Uhura to open the channel.

INTERCUT:

21 INT. CONTROL CENTRAL - IRW HAWK'S TALON - VIEWSCREEN INSERT 21

On screen, CHARVANEK -- the female Romulan commander from  
'The Enterprise Incident' -- APPEARS.

INTERCUT:

22 INT. BRIDGE - USS ENTERPRISE 22

[RED ALERT.] Kirk steps forward gallantly.

KIRK

Commander.

CHARVANEK V.O.

remains... the Enterprise violated  
interstellar law by entering  
Romulan space.

CHARVANEK V.O. (cont'd)

(beat)

Shall we call it 'war' now, Captain  
Kirk? Or await an official  
declaration?

Off Kirk, in shock...

23 INT. KIRK'S QUARTERS - USS ENTERPRISE

23

[No longer red alert.] Kirk SLAMS his fist onto the table.  
REVEAL Kirk seated. Spock standing.

KIRK

Contacting the Romulans -- that  
Romulan! -- on your own  
initiative?! Why didn't you tell  
me?

SPOCK

You would not have agreed.

KIRK

Damn right I wouldn't have! You're  
lucky I don't rip one of those  
stripes off your sleeve.

SPOCK

Captain. I became aware of reports  
that Charvanek was granted command  
of a new bird-of-prey after she was  
repatriated. I am confident --  
once I speak with her -- that she  
will see the wisdom of assisting us  
in pursuing the Romulan dissidents.

(beat)

She and I have a... 'rapport.'

Kirk reacts. Calms himself and nods.

KIRK

Bring her aboard.

Spock heads toward the door, but Kirk stops him.

KIRK (cont'd)

Spock. You've got thirty minutes  
to persuade her.

(beat)

(MORE)

(CONTINUED)

23 CONTINUED:

23

KIRK (cont'd)  
Is that long enough for your...  
'rapport'?

Spock raises an eyebrow. LEAVES. Kirk follows him out.

24 EXT. SPACE - USS ENTERPRISE &amp; IRW HAWK'S TALON

24

Hawk's Talon in foreground; Enterprise in background. The ships hover, motionless.

25 INT. TRANSPORTER ROOM - USS ENTERPRISE

25

Spock WORKS the transporter controls as Charvanek MATERIALIZES, accompanied by a male ROMULAN LIEUTENANT. Kirk, Dickerson stand waiting.

KIRK  
Welcome to the Enterprise -- again.

CHARVANЕК  
Captain.

SPOCK  
Mister Dickerson. Please conduct the lieutenant to guest quarters.

DICKERSON  
Aye, sir.

The Lieutenant hesitates briefly... but Charvanek gives him an imperceptible nod. He gives a clenched-fist Romulan salute and -- with Dickerson -- LEAVES.

Spock and Charvanek lock gaze for a moment, a thought passing between them.

Spock now gives Kirk a look. Unsaid: 'If I may...' Kirk returns his look. Unsaid: 'This better work, Spock.' Kirk LEAVES.

Spock turns back to Charvanek.

SPOCK  
*Jolan tru.*

She steps down from the platform.

(CONTINUED)

CHARVANEK

And should I greet you as your people would? 'Live long and prosper'?

SPOCK

You may greet me as you wish.

(beat)

Human lore suggests I offer the 'other cheek.'

Charvanek cracks a small smile.

CHARVANEK

I confess, the humans did treat me well. Still, I was surprised an 'exchange' was arranged so quickly.

SPOCK

Logic dictated your return would entice the praetor into releasing the Tellarite merchants held on Remus.

CHARVANEK

You mean the Tellarite spies.

SPOCK

They would have sold the information they acquired; my terminology is apt.

CHARVANEK

(with another small smile)

Now who is being clever, Spock?

SPOCK

The praetor would seem quite loyal to you. Is your loyalty to him as great?

She gives him a questioning look. Spock steps toward her.

SPOCK (cont'd)

Commander. He needs your help.

(lower)

I need your help.

(CONTINUED)

25 CONTINUED: (2)

25

A long beat, as she lets that sink in. They share a look... and she recovers:

CHARVANЕК

Your father negotiated the arrangement that led to my return. The house of Sarek has my gratitude. I will aid you.

(beat)

If I can.

Spock nods.

26 INT. CORRIDOR - USS ENTERPRISE

26

Kirk, Spock, Charvanek move down the hallway.

KIRK

Commander, I appreciate your assistance.

CHARVANЕК

Spock mentioned Romulan 'dissidents.' And kidnapped humans with psionic abilities.

(shakes head)

Our intelligence sources know nothing of these 'marauders.' To track them, I'll require their ship's configuration, armaments.

SPOCK

Then we are -- to use an Earth expression -- 'in luck.'

(off her reaction)

We apprehended a Romulan commander on Aldebaran Three. An undercover member of the vessel's crew... still loyal to the praetor.

They approach...

27 INT. CORRIDOR/BRIG - USS ENTERPRISE - CONTINUOUS

27

The HUM of the force-field door rises as they draw nearer. DRAKE is standing guard.

(CONTINUED)

27 CONTINUED:

27

Charvanek looks into the brig cell. Sentek, seeing the commander, gives her the clenched-fist Romulan salute.

SENTEK

*Jolan tru.*

But Charvanek doesn't reciprocate. Instead, she wheels to face Kirk and Spock.

CHARVANEK

I have never seen this individual before. He's certainly no Romulan commander.

KIRK

Are you sure?

Suddenly, we hear the TRANSPORTER WHINE. Inside the brig, Sentek DEMATERIALIZES!

Drake and Charvanek look astonished. Kirk POUNDS the wall intercom button.

KIRK (cont'd)

(into comm)

Transporter room! What the hell are you doing?

28 INT. TRANSPORTER ROOM - USS ENTERPRISE

28

The TRANSPORTER CHIEF activates the INTERCOM.

30 EXT. SPACE - USS ENTERPRISE & IRK HAWK'S TALON 30

The Enterprise and Hawk's Talon hover in space.

31 INT. TRANSPORTER ROOM - USS ENTERPRISE 31

Kirk speaks with the Transporter Chief, while Charvanek stands by. Spock studies the controls. Dickerson stands guard.

The Transporter Chief is confused. She rubs her head, in a daze.

TRANSPORTER CHIEF

Captain, I swear I received orders  
to transport the prisoner. I just...  
I don't remember where...

SPOCK

Sir, the targeting scanner's memory  
logs have been erased. But the  
impostor could not have traveled  
far. Our shields have remained at  
full power since Commander  
Charvanek beamed aboard.

CHARVANEK

KIRK

Dickerson. I need security teams

SCOTT

Got ya, ya lovely!

Scott scrambles up the ladder and begins to WORK on a panel.

Kirk RUSHES Sentek as well. Sentek TOSSES the men aside like rag dolls. Dickerson's phaser goes flying!

Charvanek -- who also has Romulan strength -- CHARGES at Sentek! They STRUGGLE.

Scott WORKS quickly at the panel. The electro-plasma MIST begins to DISSIPATE.

Sentek brings his right hand up to grip Charvanek's face. She GASPS, and he brings his left hand up, completing a nerve pinch. Charvanek DROPS to the floor.

The MIST is finally gone.

SCOTT (cont'd)

Clear!

Kirk scrambles to recover Dickerson's phaser pistol. He scoops it up and FIRES.

Sentek collapses against a console, his head SMASHING into it. He falls to the floor, green blood oozing from his forehead.

Kirk kneels next to Charvanek, examining her motionless form. Reactions from all...

Charvanek's BIO-MONITOR shows her as dead. No pulse, no respiration; all arrows at the bottom. The red 'death lights' GLOW at the top of each column.

M'BENGA

(to Kirk)

If the nerve pinch was as you described, Charvanek will be incapacitated for at least three hours.

KIRK

We don't have that kind of time, doctor. Her subcommander is demanding her immediate return.

M'Benga takes a moment. A decision.

M'BENGA

They're better equipped to treat her than we are.

Kirk nods quietly.

KIRK

Burke, prepare the commander for transport.

Nurse stays with Charvanek, readying her for departure... as Kirk and M'Benga move to the far bed.

REVEAL Sentek, still unconscious, strapped to it with restraints. Now in medical coveralls. Drake stands guard over him.

KIRK (cont'd)

I've been doing some digging. The Aldebaran colony's last census listed one Vulcan.

A male anthropologist named 'Sentek.'

(off Kirk's reaction)

There's more, Jim. Federation records show Sentek and our friend Lana are married. And his ESP rating is through the roof. He's got natural psionic abilities that're way beyond normal... even for a Vulcan.

KIRK

If his powers were already so strong... why come to an esper lab?

DRAKE

Maybe to find a mate.

M'BENGA

But we are. We're superior.

KIRK

LANA  
And selection -- whether natural or  
artificial -- is the engine of  
evolution. Your kind should

KIRK  
Chief.

Drake pulls his phaser. Nods for Lana to come with him. She  
complies... too easily. Smiles as she passes Kirk:

LANA  
Why do you suppose the Preservers

galaxy?

MCCOY  
Why? Hell... prob'ly to contain us.  
To keep violence from spilling out

Reactions!

Suddenly, the turbolift SWOOSHES open... and out come Lana and Sentek!

LANA

You're too late, captain.  
Relinquish command... or the  
Enterprise will suffer the same  
fate as the Hood.

PLAY Kirk's reaction as we SUPER:

TO BE CONCLUDED

FADE TO BLACK.
